## TECHNICAL DATA SHEET TBL-89159UW16

1 / 6

### 1. FEATURES

- ※ 87×145mm is emitting surface size of backlight
- ※ Low power requirement, solid state reliability.
- ※ Multicolor available, stackable horizontally.
- ※ Categorized for luminous intensity.
- ※ Easy mounting on P.C. boards.
- ※ Remain within RoHS compliant version.

### 2. DESCRIPTION

- ※ The TBL-89159UW16 is a 87×145mm emitting surface backlight.

### 3. APPLICATION

- ※ General lighting solutions
- ※ LCD display backlight

**7. SOLDERING CONDITIONS**

The recommended conditions for soldering are as follows.

Because the component is made with epoxy resin, the units are susceptible to heat. Therefore, the preheating and soldering temperatures should be kept as low as possible to avoid damage.

**7-1. Manual Soldering Conditions(with 1.5mm Iron tip ).**

Iron Tip Temperature: 350°C Max, Time: 3s Max.

Position: The iron should be situated at least 2mm away from the root of the leads.

**7-2. Through the Wave Soldering Conditions Wave Soldering Profile For Lead-free Through-hole LED.**

**7-3. Soldering General Notes:**

- Recommend manual soldering to be used only for repair and rework purposes. The soldering iron should not exceed 30W in power. The tip of the soldering iron should not touch the reflector case to avoid heat-damage.
- Maintain the pre-heat and peak temperatures with dip units as low as possible and the times as short as is feasible, since the products are susceptible to heat during flow soldering.
- After soldering, least three minutes for the component to cool to room temperature before further operations.
- If components will undergo multiple soldering processes, or other processes where the components may be subjected to intense heat, please check with for compatibility.
